High-Quality Certification Exam Premium VCE Braindumps materials

**Exam** : **HH0-050**

**Title** : Hitachi Data Systems  
Storage Technology

**Vendor** : Hitachi

**Version** : DEMO

NO.1 What are two advantages of implementing a thin provisioning storage solution? (Choose two.)

- A. It enables the logical partitioning of ports, cache and disks (parity groups).
- B. Striping data across many spindles optimizes back-end performance.
- C. Provisioning storage from a virtual pool improves storage utilization.
- D. Large volume performance is increased because each parity group has a unique workload.

**Answer:** B,C

NO.2 Which two cache partition management functions would a storage manager perform to improve storage performance? (Choose two.)

- A. Virtualize heterogeneous storage resources.
- B. Adjust storage resources in response to business changes.
- C. Dedicate storage resources to certain applications.
- D. Duplicate storage resources within cache.

**Answer:** B,C

NO.3 A customer wants to replicate their database for the accounting and finance departments. What is a benefit of accomplishing this with a clone replication technology?

- A. It uses less storage than a snapshot copy.
- B. It creates an exact copy of the database.
- C. It identifies index corruption on the database.
- D. It provides continuous data protection.

**Answer:** B

NO.4 Which two physical cable types does Ethernet use for transmitting data? (Choose two.)

- A. firewire
- B. 3-Phase
- C. fiber optic
- D. twisted pair

**Answer:** C,D

NO.5 Which term defines the shape of a network or the arrangement of devices on a network?

- A. interface
- B. topology
- C. protocol
- D. zone

**Answer:** B

NO.6 What are two strengths of implementing storage in a SAN compared to using DAS? (choose two.)

- A. It costs less than a DAS solution.
- B. It facilitates data management.
- C. It enables all applications to access all data.
- D. It limits access to data to the owning server.

**Answer:** B,C

NO.7 When using IP to transfer data over a network, which protocol re-combines IP packets into the correct order to re-create the message sent from the source?

- A. FCIP
- B. iFCP
- C. UDP
- D. TCP

**Answer:** D

NO.8 What are three common network terms? (Choose three.)

- A. LAN
- B. DAS
- C. ATA
- D. node
- E. WAN

**Answer:** A,D,E

NO.9 Which backup and recovery factor does RTO represent?

- A. RTO measures how long it takes to resume essential operations.
- B. RTO measures productivity lost in the event of an outage.
- C. RTO measures loss of production permissible when resuming after a disruption.
- D. RTO measures the financial loss incurred due to an outage.

**Answer:** A
